

CSI Newsletter: September 2021

Next Meeting: via Zoom, **Friday, September 3, 2021 ~ 7:30 PM**

NEWS you need to know:

The PW-6 is GROUNDED until the front rudder pedals assembly is repaired. PW-6 is scheduled returning to Hemet about 09/04/2021.

**** Treasurer:** Year to date: 12/01/20 to 08/06/21: Balances reimbursing club accounts are getting closer to be filed. Expenses still outpace income. More at the membership meeting in September.

Presidents Message: Riverside County is continuing to have **Covid-19** and other forms of the virus, therefore all members to wear a mask on the field. Wipe the planes down inside and out, **before and after** you fly.

VP: The Board is accepting some student pilots that are rated and will not require a lot of initial pilot training to become current.

Flight Ops.: Flights have slowed down a bit due to hot weather and of course less instructional flights. Should be increasing in September.

Maintenance: All gliders but for PW-6 are currently airworthy.

Thanks to **Scott Lance** for his weekend weather reports for Hemet-Ryan Airport.

Your questions and/or comments are welcomed.

Tom Orbison, Secretary
Cypress Soaring, Inc.
